

Introducing: V-Comp™

Verity's Fully-Automated Compensation System

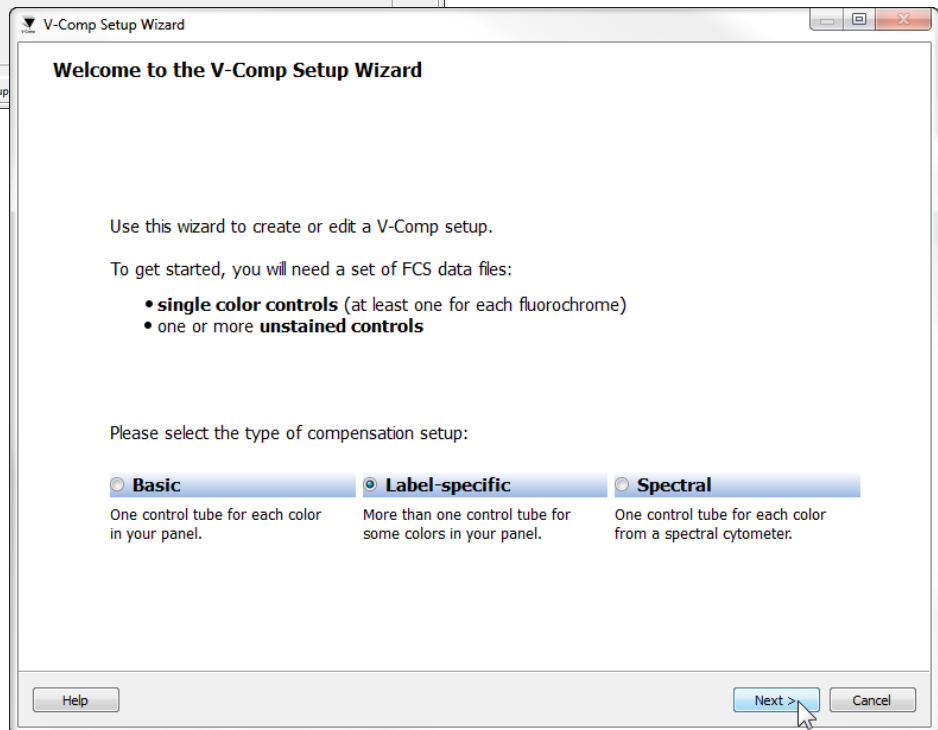

V-Comp™ is a fully-automated fluorescence compensation utility. Wizard-driven and easy to use, V-Comp is designed to fit seamlessly into your routine lab work-flow. Just run your controls, acquire your data, drop your files into V-Comp for compensation, and move on to analysis with your favorite tools.

Verity Software House

45a Augusta Rd
Topsham Maine 04086

Phone: 207.729.6767
E-mail: verity@vsh.com

V-Comp automatically accommodates generic and label-specific tubes for working with tandem dyes or other combinations that might require different compensation values. If a conjugate lot changes or you make a change to your panel, editing is easy.

Setup Validation

APC-H7-A:
 - No signal detected for Compensation Controls_CD3 APC-H7
 - These controls both have a long name of CD3:
 • Compensation Controls_CD3 APC-H7 BAD-Stain Contr
 • Compensation Controls_CD3 APC-H7 Stained Control

450/50-A:
 - These controls both have an empty long name:
 • Compensation Controls_450,2f,50 Stained Control_06
 • Compensation Controls_450,2f,50 Stained Control - B

Corrective Action:
 • Drag controls to the matching detector
 • OR make corrections on the [Single-Color Controls](#) page
 • THEN click Next to re-evaluate the setup
 • OR [acknowledge these warnings and continue](#)

If your controls are invalid, V-Comp will alert you to rerun them before you spend unnecessary time applying inadequate compensation.

V-Comp Setup Wizard

Match Controls with Detectors

Drag and drop the controls to match them to the correct detector.

Setup Name: Weekly Compensation Setup

Detector ID	Name	Relative Brightness
	Compensation Controls_PE-Cy7 Stained Control.fcs	61034

V-Comp Setup Report

Date: 15-May-2015
 Current time: 13:23:11
 Time to process controls: 0m 12s

Setup Information

Research Use Only Mode

Setup name: Weekly Compensation Setup
 Setup type: Label-specific
 Description: Label-specific setup with 26 controls and 8 detectors
 Configuration: 26 signals, 8 detectors
 Setup Path: C:\Users\Bruce.WORKGROUP\Documents\V-Comp for Windows\Setups\
 V-Comp Engine Version: 29
 Last modified: 15-May-2015 13:22
 Modified by: Bruce

Export path: same path as source files
 Overwriting: ask before overwriting export files
 Drift correction: enabled for control files
 V-Comp method: Automatic

Output type: export files with a new \$SPILLOVER keyword and the original data

V-Comp creates accurate and consistent compensation without requiring gating of positive or negative populations or other subjective decisions. Quality control reports are saved automatically, providing you with an audit trail and confidence in your results.

QA/QC

Controls	Remarks
Compensation Controls_CD71 FITC Stained Control_06012015141239.fcs	High drifting was detected (10.04%) FITC-A CD71 throughout the file.
Compensation Controls_FITC Stained Control.fcs	High drifting was detected (10.18%)

V-Comp output files maintain the integrity of your original data file. For Beckman Coulter users, acquisition setup protocols transfer upon export so your files open seamlessly into your analysis templates, saving you valuable time.
