WinList 7.0 Licensing Options

Stand-Alone Version

Each user has a license serial number, which can be installed and registered on one computer.

Primary User: **\$1650**

Additional User: **\$600**

Update from Previous Version: **\$400**

Network Version

This version is installed on one computer which acts as a server. The server keeps track of current users and available seats. Additional seats can be purchased to support more simultaneous users.

Each server installation requires a Network 2-User Starter.

Network 2-User Starter: **\$2490**

Additional Seat: **\$840**

Migrate to the Network Version

There is also a migration plan for previous version stand-alone licenses to move to the Network version.

A. Start by purchasing a Network 2-User Starter.

B. Migrate your previous version licenses to Network Seats for **\$550** each.

After migration, the previous version licenses become obsolete and cannot be updated or installed again.

Contact us for a quote

We understand that each lab has its own, unique requirements. We can help you determine the best mix of network and stand-alone licenses for your lab to give you the most cost-effective and flexible access to WinList licenses. Contact our sales team at sales@vsh.com to get a personal quotation.
